Date(s) of conduction	: 5 th June 2025
Class / Sem	: NA
Faculty coordinator	: Dr. Sudhir M. Purohit
Student coordinator/ committee	: NA

DESCRIPTION

Objectives: To celebrate the world environment day and create awareness about the protection of the environment through small but impactful contribution by the individuals.

Key Takeaways: The Event started with an objective of celebrating the World Environment day and followed by the tree plantation regime by the teaching and non-teaching staff with the gardening staff's guidance and support. The celebration was continued with sweet distribution to the gardening staff members as a token of respect by Dr. Nitin Gode. The event continued with the speech by Dr. Sudhir Purohit on the importance of Sustainability.

We need to take continuous efforts to protect the environment and save The Mother Nature for our future generation. Each small effort is very important to protect the environment.

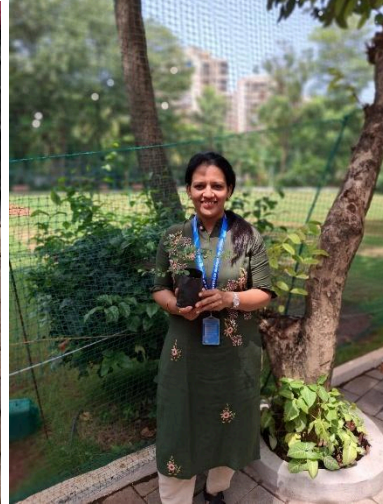

Learning Outcomes: This is the right time for us to take serious steps to protect the environment by tree plantation, using renewable resources and cutting down our greedy needs and just satisfy our basic needs so that we use the resources of the environment in limits.
